- ♣ We are in full swing with pruning. Some plants got a late start and we have not pruned them yet. Over the next 3 or 4 weeks, all or most of the pruning will be performed.
- ♣ Now that the rain has stopped, irrigation should be on at full speed. Please let us know if there are problems, concerns or even if you just need some over the phone advice. We will address them ASAP.
- ♣ If you think your yard is looking like it could use more color, different plants or just a change, we would love to give you some fresh ideas and come up with something new.
- ♣ Remember to keep your eyes open for problems, such as insects, dry grass, etc. so we can address them quickly. It helps when we have an extra set of eyes to pass along landscape concerns. Call or e-mail us!
- ♣ **FYI:** On June 1st a tree on the property was struck by lightning! This led to extreme damage to computers, phones, fax and everything electrical. If you tried to reach us during the first week of June and we did not respond or reply, this was the reason why. We apologize for any inconvenience. Everything has been replaced, repaired and we are back to normal. Normal feels great!!!

Summer is already here and everything is in full bloom.

What a perfect time of year, enjoy it!

“EXPERIENCE LANDSCAPE EXCELLENCE”
